JONATAN PADILLA

Senior Software Engineer · Mobile Architect | Flutter · Clean Architecture · Design Systems · AI-Assisted Development
Medellín, Antioquia, Colombia | +57 300 271 7154 | email@jdpadillac.com | linkedin.com/in/jdpadillac

PROFESSIONAL SUMMARY

Senior Software Engineer with 8+ years of experience, specialized in Flutter/Dart mobile architecture for banking, fintech, and retail. I design and evolve scalable architectures using Clean Architecture, modularization with micropackages, and Design Systems based on Atomic Design, and I integrate native iOS and Android code through Pigeon bridges. I use AI-assisted development daily (Cursor, GitHub Copilot, Claude Code) and led a spec-driven development proof of concept. Experienced as Mobile Architect, Mobile Chapter Lead, and Tech Lead: defining standards, mentoring developers, and leading code reviews. English level: B1, currently in ongoing training.

TECHNICAL SKILLS

- **Mobile:** Flutter, Dart, Riverpod, Bloc, MethodChannel/Pigeon, Flutter Web, Melos, Thales D1 SDK
- **Native:** Swift/SwiftUI and Kotlin (basic)
- **Architecture:** Clean Architecture, MVVM/MVI, SOLID, modularization, micropackages, Design Systems (Atomic Design)
- **Testing:** Unit, widget, and integration tests
- **CI/CD & Quality:** GitHub Actions, Codemagic, Fastlane, Sonar, linters, Git
- **AI-Assisted Development:** Cursor, Claude Code, GitHub Copilot, Cursor Rules, context engineering, MCP, spec-driven development, agent skills
- **Backend (intermediate):** Java, Spring Boot, Go, REST APIs, microservices
- **Databases:** PostgreSQL, Oracle, MySQL, Firebase/Firestore
- **Observability:** Grafana Faro

PROFESSIONAL EXPERIENCE

SEEK — Mobile Architect, Flutter

Mar 2025 – Present | Remote (Lima, Peru)
Client: SIP, a product of InFinancexp (Interbank Group)

- Define the architecture, technical standards, and development guidelines for Agora/SIP digital products.
- Designed and implemented a Design System based on Atomic Design, adopted by all InFinancexp products.
- Built a wallet provisioning micropackage (push provisioning) with Thales D1 SDK, Pigeon bridges to native Swift and Kotlin code, and a provider-agnostic architecture.
- Developed the Digital Token library and integrated the Payments module, coordinating with security and QA teams.
- Use AI-assisted development daily (Cursor, GitHub Copilot) and led a spec-driven development proof of concept.
- Lead code reviews, technical mentoring, and alignment of cross-functional teams around quality standards.

Siigo — Sr. Advanced Full Stack Engineer

Jan 2024 – Mar 2025 | Bogotá, Colombia

- Technical lead of the Flutter POS module, focused on scalability, traceability, and zero production incidents.
- Designed a micropackage architecture from scratch (5 packages delivered), enabling the POS to scale independently.
- Implemented a Design System based on Atomic Design, scalable to other Siigo products.
- Built a Flutter–JavaScript bridge for thermal receipt printing, integrating the SDK within business technical constraints.
- Implemented Grafana Faro for traceability and error resolution, eliminating frontend postmortems.

TUL — 2 years 4 months | Colombia

Mobile Chapter Lead

Apr 2022 – Dec 2023

- Designed a modular Flutter architecture by vertical and micro-features, focused on scalability and domain ownership.
- Designed a Design System (Atomic Design) with shared theming to accelerate releases.
- Defined the “Mobile Bible”: standards, guidelines, and module structure; led PR reviews and mentoring.

Sr. Mobile Developer

Sep 2021 – Apr 2022

- Senior Flutter development, laying the foundation for the standards later adopted as Chapter Lead.

WACO Digital Hub — 3 years 7 months | Colombia (Remote, Freelance)

Senior Software Developer (Freelance)

Feb 2023 – Aug 2024

- Backend development with Go and Java: microservices support and production stabilization for clients Merca Z and Mercamio.

Tech Lead Mobile (Freelance)
Feb 2022 – Feb 2023

- Led a team of 5 across frontend (Angular), mobile (Flutter), and backend.
- Expanded the Vatia project from a single mobile app into a full platform (backoffice, backend, and two additional apps), owning architecture decisions.

Flutter Developer (Freelance)
Feb 2021 – Feb 2022

- Built cross-platform apps with Flutter for Vatia (solar energy records) and Gourmeats (restaurant ordering platform), applying Clean Architecture.

PersonalSoft (for Bancolombia) — Sr. Software Developer
Oct 2020 – Sep 2021 | Medellín, Colombia

- Senior mobile developer in the transformation of Bancolombia's digital channels, including Bancolombia a la Mano, using Flutter and Xamarin.
- Built reusable components aligned with the Design System and accessibility standards.

EDUCATION

Engineering — Universidad Nacional Abierta y a Distancia (UNAD) (in progress)

CERTIFICATIONS

- Claude Code — Platzi (2026)
- Backend Development with Java — Platzi (2025)
- Spec-Driven Development — EDteam
- Frontend Architecture — Platzi

LANGUAGES

Spanish — Native | English — B1 (Intermediate), ongoing training with a private tutor
